

FELTON ROAD

2018 Felton Road Pinot Noir *Calvert*

Tasting Note

A floral and delightfully perfumed nose immediately engages and enthralls. Sweet fruit opens the palate exposing layers of dark cherry, spice and complex earthy notes. The sense of immediacy and open appeal is quickly tempered by its structural and mineral tannins: a mouthfeel characteristic of Calvert's deep and heavy silt soils. They contribute a stature and seriousness to the proposition: contemplative and sincere.

Introduction

Beginning with meticulous site selection and vineyard design started in 1991, Felton Road's story is one of refusal to compromise. A strict 100% estate policy with fully organic and biodynamic viticulture (Demeter certified) ensures that our fruit arrives at the winery as pure as it can be, while our entire estate comes as close to true sustainability as is possible. A commitment to hands off winemaking: gravity flow, wild yeasts, wild malo, an avoidance of fining and filtration all help preserve the wine's expression of its terroir. The result is Riesling, Chardonnay and Pinot Noir which accurately express the authenticity and complexity of our unique vineyards.

Gareth King; Viticulturist, Blair Walter; Winemaker, Nigel Greening; Proprietor.

Vineyard & Viticulture

Felton Road farms four properties totalling 32 ha in the Bannockburn sub-region of Central Otago. Calvert Vineyard is located on Felton Road and is just 1km east of The Elms Vineyard and the winery. The soils at Calvert are deep heavy silts with a thin layer of loess topsoil. Meticulous summer management of a single vertical shoot positioned (VSP) canopy ensures even and early fruit maturity. Shoot thinning, shoot positioning, leaf plucking, bunch thinning and harvest are all carried out by hand to ensure optimum quality fruit. Cover crops are planted between rows to assist in controlling vine vigour and to improve soil health and general biodiversity.

Vintage

A vintage characterised by exceptional heat, with warmer than normal overnight temperatures being of particular note from October through January. As has often been the case, this was a vintage of two halves. When our calendars moved from January to February, the turning of the page was both literal and figurative. Temperatures crashed back down to ordinary levels (in fact, the coolest in 14 years) and the drought was broken by the wettest February on record. This cool and wet month slowed the ripening considerably and fortunately allayed our concerns for the potential style and quality of the wines; due to the preceding warm months and advanced season. Harvesting began early on 28 February and proceeded in an orderly and measured pace over the next three weeks.

Vinification

The unique gravity flow winery enabled the grapes to be gently destemmed directly into open-top fermenters without pumping with approximately 25% as whole clusters. Long pre-fermentation soaks of 8-10 days prior to fermentation with indigenous yeasts and punched down by hand up to two times per day with a total time on skins of 21-23 days. Pressed off and barrels filled immediately by gravity to the underground barrel cellars. The wine spent 16 months in barrel (30% new French) with two rackings and no fining or filtration, before bottling in late-August 2019.
